

Bouma USA[®]

Master Emergency Action Plan

**NHA Johnston Project
40 Scholar Drive, Clayton, NC 27520**

MASTER

EMERGENCY ACTION PLAN

Although Bouma USA takes precautions to prevent them, emergencies do occur. When they do, they require quick, correct and decisive responses. Employees and Subcontractors have been informed of the company's planned response to emergency situations, and they are expected to adhere to these guidelines for the duration of this project.

The intent of the plan is to ensure all employees a safe and healthful working environment. Those employees assigned specific emergency duties under the plan should be provided the necessary training and protective equipment to ensure their safety.

SCOPE OF THE PLAN

The plan applies to many emergencies that could be reasonably expected in the workplace but are not limited to:

Earthquake

Explosion

Fire

Crane collapse

Workplace Violence

Disaster

EMERGENCY PLAN COORDINATORS

The Emergency Plan and Fire Protection Plan Coordinator(s) is/are as follows:

David Stanley 616-250-3326

Steve Marsman 616-450-4862

The Coordinator is responsible for maintenance of equipment. The Coordinator may be contacted for further information on or explanation of the Plan.

ELEMENTS OF THE PLAN

I. Preferred Means of Reporting Fire and Emergencies

All fires and emergencies will be reported by one of the following means:

- Verbally to the Coordinator if during standard work hours
- By telephone if after hours or on weekends or if the Coordinator is offsite
- By the alarm system 24 hours a day
- Public address system (if applicable)

The following numbers will be posted at all telephones having outside lines:

FIRE: 911

SHERIFF: 911

POLICE: 911

AMBULANCE: 911

Jobsite address: Southeast of Clayton Walmart; Approx. 12641 US 70 Business Highway West, Clayton, NC 27520

Closet Medical Center: FastMed Urgent Care
11491 US Hwy 70 W, Clayton, NC 27520
Phone: (919) 550-2484

Closest Hospital: Johnston Health Clayton
2138 NC Hwy 42 W, Clayton, NC 27520
Phone: (919) 585-8000

II. Alarm System Requirements

Alarm system requirements for notifying all employees in an emergency are the following:

- Provides warning for safe escape
- Can be perceived by all employees
- Alarm is distinctive and recognizable
- Employees are properly trained
- Emergency telephone numbers posted
- Emergency alarms have priority
- Alarm system is maintained properly by trained personnel

III. Sounding the Alarm

The signal for immediate evacuation for the facility will be the sounding of an audible air horn emergency signal. When an emergency that warrants evacuation is reported, the Coordinator or his designee, will sound the air horn signaling the need to evacuate the jobsite.

IV. Evacuation Plans

Emergency evacuation escape route plans (see appendix A) are posted in key areas throughout the jobsite and in the main jobsite trailer. All employees have been trained concerning these plans and evacuation procedures.

V. Employee Accountability Procedures After Evacuation

In the event of a fire emergency signaled by the Emergency air horn signal, all employees and subcontractor employees will promptly exit the jobsite by the nearest exit. Once out of the jobsite, go to the nearest designated rally point and immediately report to their supervisor. After evacuation, each supervisor (or designee) is responsible for accounting for each employee assigned to that supervisor by rallying at the designated point and by conducting a head count. Each employee will be accounted for by name. Each employee is responsible for reporting to his or her supervisor so an accurate head count can be made. All supervisors are required to report their head count (by Name) to the Emergency Plan Coordinator.

Designated Rallying Points

Rally point 1 – Sidewalk at fire entrance at Palmdale Blvd (North of jobsite)

Rally point 2 – Sidewalk at fire entrance at 35th Street East (East of jobsite)

Rally point 3 – Sidewalk at fire entrance at Ave Q-10 (South of jobsite)

VI. Rescue or medical duties procedure

Only employees and subcontractor employees that are trained in first aid and the Blood borne pathogens standard are allowed to perform First Aid or other emergency medical procedures. Rescues involving machinery, cave ins and or high angle rescue are to be performed by trained and authorized personnel.

VII. Re-entry

Once the jobsite is evacuated, no one is to re-enter for any reason. Rescue personnel (if designated and properly trained or the Fire Department/City Emergency Personnel) are excluded from this rule. When the Fire Department or other responsible agency has notified us the jobsites is safe for re-entry, then, and only then, will personnel return to their workstations.

VIII. Training for Employees Who Assist in Evacuation

The personnel listed below have been trained to assist in the safe and orderly emergency evacuation of employees. Employee training is provided to employees when: (a) the plan is initiated; (b) when employee's required actions and responsibilities change; (c) there are any changes to the plan.

David Stanley

Steve Marsman

Subcontractors are required to have trained a proportionate number of employees in assisting in evacuation assistance, CPR/First Aid and respective emergency procedures to their trade. All subcontractor employees shall be trained in this Emergency Action Plan.

IX Training for Employees

Employee training is provided when:

- The plan is initiated
- When employee's required actions and responsibilities change
- There are any changes to the plan
- Initially for new employees

Items Reviewed:

- Emergency Escape Procedures
- Escape Route Assignments
- Fire Extinguisher Locations and Training
